Highlights

Versatile Staff Software Engineer with a specialization in frontend development, with over fifteen years of professional and leadership experience in diverse industries. Demonstrated proficiency in all phases of the product development cycle, from conceptualization to deployment, with a particular emphasis on team leadership and agile project management. Seeking to leverage my technical expertise and strategic vision in a new organization.

Experience

EnergySage Staff Software Engineer >

2018–Present

Led the Community Solar team as the Technical Lead, supervising engineering operations.

Established and chaired the Frontend Guild, promoting frontend best practices and modern JavaScript frameworks across the organization.

Developed and implemented competency and level definitions for the Engineering department.

Fostered a culture of growth and development as Engineering Manager, growing the department from 6 to 40 members, and playing a pivotal role in company growth and product expansion, leading to a successful acquisition.

Promoted from Senior Engineer to Staff Software Engineer due to exceptional performance.

BuildingEngines Senior UI Developer >

2011–2018

Directed the design and development of the frontend layer for multiple enterprise SaaS applications while coaching junior developers in frontend technology and Agile methodologies.

Established and sustained beneficial relationships with external vendors, partners, and clients, making substantial contributions to the growth of the company and its products, leading to a successful acquisition.

Promoted from Web Developer to Senior UI Developer due to exceptional performance.
